

REAL WORLD LEARNING WIND TUNNEL KIT

Looking for a resource that supports STEM learning and thinking?

Wind Tunnels provide children with an opportunity to explore the concepts of air flow and aero dynamics. Investigating that mysterious, invisible natural element; wind!

Through experimenting with a range of everyday items, children can explore what objects move, fly, drop, spin or hover because of the power of the wind. They can estimate, predict and measure how high or how fast different objects move through the tunnel.

Kit includes a comprehensive STEM Detectives Clue Sheet including ideas for experimenting with your wind tunnel.

For more information, to arrange a quote or order your RWL Wind Tunnel Kit contact David on 0429 080 467 or email

david@realworldlearning.com.au. Shipping available to most locations around Australia.

**Support the development
of STEM thinking skills.**

**Engage children in STEM
through playful
experiences**

**All you need to get
started.**

**Includes ideas for using
your wind tunnel with
children of all ages**
